- Collaborated with collegues on mini projects and group activities, enhancing teamwork and communication skills.

- Actively participated in technical workshops and seminars, gaining experience about real-world technologies.

Skills

- ReactJS
- HTML5&CSS3
- Tailwind
- Git & Github
- Rest API
- Python basics for DS&A
- Logistics Operations
- Adaptability
- Problem Solving

Profile

I'm excited to join **Wipro** as a Web Developer and help build modern, user-friendly websites using the latest front-end technologies. Wipro has been a dream company for me since my younger days, and I'd love to be part of your team.

I'm a self-motivated **Front-End Developer** with hands-on experience in **React.js** also learning Python with DS&A. I enjoy building clean and responsive web apps and solving problems. With my background in logistics at **DHL** and a diploma in engineering, I bring strong skills in time management, adaptability, and a constant drive to learn and grow.

Employment History

Operations Assistant, DHL
December 2021 — January 2025

- Coordinated day-to-day logistics and ensured smooth movement of packages, shipments, and delivery operations.

- Monitored inventory, handled documentation, and maintained accurate records of inbound and outbound goods.

- Gained hands-on experience with operational software and systems, boosting technical confidence.

- Strengthened communication skills by interacting with customers and internal teams daily.

- Developed adaptability and time management by working in a fast-paced, deadline-driven environment.

Projects

Portfolio Website

A personal website built using **React.js** and **Tailwind CSS** to showcase my skills, projects, education, and experience. It is hosted on GitHub Pages.

🔗 [View Project](#)

Arcade Game

A fun and interactive game created using **HTML, CSS,** and **JavaScript**. It helped me understand how to build dynamic and engaging front-end experiences.

🔗 [View Project](#)

IP Address Tracker

A React app that uses an API to fetch and display the location (city, country, timezone, ISP) of any IP address, with a map to show the location. Built using **React.js** and **Tailwind CSS**.
